Borrowing Base Covenant & Compliance Certificate

Illustrative Applications of CRI-8G Rates in Borrowing Base Structures | v1.0.0

ILLUSTRATIVE EXAMPLE — FOR REFERENCE AND DISCUSSION PURPOSES ONLY

This document does not constitute legal advice, a credit commitment, or a regulated benchmark publication. CRI-8G rate values are hypothetical. Consult counsel before incorporating any reference rate into a credit agreement.

PART I — Credit Agreement Excerpt

The following provisions are illustrative excerpts from a hypothetical senior secured revolving credit agreement between a GPU compute operator ("Borrower") and an institutional lender ("Administrative Agent"). The covenant framework references the three-covenant structure described in the CCIR GPU Credit Framework v1.0.0.

Article I — Defined Terms

Defined Term	Definition
"CCIR"	Compute Credit Index Research, an independent benchmark administrator that publishes the Compute Rate Indices (CRI) in accordance with the IOSCO Principles for Financial Benchmarks. CCIR is not affiliated with any GPU marketplace, cloud provider, or lending institution.
"CRI-8G Benchmark Series"	The family of CRI-8G rates published by CCIR, each representing the 7-day trailing median of publicly listed, noninterruptible on-demand asking rates for 8-GPU SXM nodes of the applicable GPU model, expressed in U.S. dollars per GPU per hour. The CRI-8G rate applicable to any Borrowing Base Certificate shall be the most recently published daily rate as of the Determination Date for each Eligible GPU Model.
"CRI 8-GPU Node Rate"	For any Eligible GPU Model, the applicable rate within the CRI-8G Benchmark Series (on-demand asking rate, $/GPU/hr, noninterruptible, 8-GPU SXM node) as published by CCIR on the applicable Determination Date.
"GPU Collateral Value"	As of any Determination Date, the sum for each Eligible GPU Model of: (Pledged GPUs of such model × CRI 8-GPU Node Rate for such model × Utilization Assumption × Annual GPU Hours) ÷ GPU Capitalization Rate. See §7.02(b).
"GPU Capitalization Rate"	Twenty-eight percent (28%) per annum (the "Base Capitalization Rate"), representing the agreed yield rate applied to annualized on-demand GPU rental income to derive capitalized collateral value. Reviewed annually; may be adjusted by mutual written agreement of the Borrower and Administrative Agent.
"Utilization Assumption"	Seventy-two percent (72%) for GPU hours deployed in training workloads; sixty-five percent (65%) for GPU hours deployed in inference workloads. Where a Blended Utilization Rate applies, it shall be weighted by the Training Workload Percentage certified in the most recent Compliance Certificate. The Administrative Agent may adjust the applicable rate downward (but not upward) if market data supports a lower figure, acting in good faith and in a commercially reasonable manner.
"Annual GPU Hours"	8,760 hours per year (365 days × 24 hours per day), unadjusted for scheduled maintenance.
"Advance Rate"	Sixty-five percent (65%) of GPU Collateral Value for Eligible GPU Collateral.
"Borrowing Base"	As of any Determination Date, the sum of: (a) the product of (i) GPU Collateral Value and (ii) the Advance Rate, minus (b) any reserves established by the Administrative Agent pursuant to §2.04(c).

"Determination Date"	The last Business Day of each calendar month, or any Business Day on which the Administrative Agent requests an interim Borrowing Base Certificate pursuant to §7.02(e).
"Borrowing Base Deficiency"	The amount, if any, by which Outstanding Credit Exposure exceeds the Borrowing Base as of any Determination Date.
"Rate Cap Scenario"	An analytical scenario, calculated as of each Determination Date, in which the CRI 8-GPU Node Rate for each Eligible GPU Model is assumed to be reduced by twenty-five percent (25%), thirty-five percent (35%), and fifty percent (50%), respectively, for purposes of illustrating sensitivity of GPU Collateral Value to compute rate compression.

Section 7.02 — Borrowing Base Maintenance

(a) Borrowing Base Maintenance. Borrower shall ensure that, as of each Determination Date, the Outstanding Credit Exposure does not exceed the Borrowing Base. If a Borrowing Base Deficiency exists as of any Determination Date, Borrower shall, within five (5) Business Days thereafter, either (i) repay Revolving Loans in an aggregate amount sufficient to eliminate such Borrowing Base Deficiency, or (ii) deliver to the Administrative Agent additional Eligible Collateral with a GPU Collateral Value sufficient to eliminate such Borrowing Base Deficiency.

(b) Borrowing Base Calculation. The GPU Collateral Value shall be calculated on a per-model basis as follows:

$$\text{GPU Collateral Value} = \sum \left[(N_m \times R_m \times U \times H) \div C \right]$$

Where, for each Eligible GPU Model m: N_m = GPU Unit Count; R_m = CRI 8-GPU Node Rate for model m ($/GPU/hr); U = Utilization Assumption; H = Annual GPU Hours (8,760); C = GPU Capitalization Rate (28% baseline).

The Borrowing Base equals the GPU Collateral Value multiplied by the Advance Rate, less any reserves.

(c) Borrowing Base Certificate. Borrower shall deliver to the Administrative Agent a completed Borrowing Base Certificate in the form of Exhibit F on each Determination Date, and within two (2) Business Days of any request by the Administrative Agent. Each Borrowing Base Certificate shall (i) identify the applicable CRI 8-GPU Node Rate for each Eligible GPU Model as published by CCIR, (ii) set forth the GPU Unit Count and hardware specifications of Eligible GPU Collateral by model, (iii) calculate the per-model and aggregate GPU Collateral Value and Borrowing Base, (iv) certify the Training Workload Percentage, and (v) include the Rate Cap Scenario analysis.

(d) Rate Cap Scenario Reporting. Each Borrowing Base Certificate shall include Rate Cap Scenario analysis demonstrating the Borrowing Base at CRI-8G reductions of 25%, 35%, and 50% applied uniformly to all Eligible GPU Models. If the Borrowing Base under the 35% Rate Cap Scenario falls below the Outstanding Credit Exposure, Borrower shall notify the Administrative Agent within one (1) Business Day and provide an updated collateral management plan within fifteen (15) Business Days.

(e) Interim Certificates. The Administrative Agent may, upon three (3) Business Days' notice to Borrower, require delivery of an interim Borrowing Base Certificate on any Business Day if (i) any CRI 8-GPU Node Rate has declined more than fifteen percent (15%) from the level used in the most recent Borrowing Base Certificate, (ii) the Training Workload Percentage has fallen below 50%, (iii) any data source constituting more than twenty percent (20%) of the CCIR source universe has been suspended or delisted by CCIR, or (iv) the Administrative Agent in its reasonable credit judgment determines that a material change in GPU compute market conditions has occurred.

(f) Benchmark Discontinuation. If CCIR ceases to publish a CRI 8-GPU Node Rate for any Eligible GPU Model for a period of five (5) or more consecutive Business Days, or if CCIR materially changes the methodology underlying the CRI-8G Benchmark Series without a 30-day public comment period, the Administrative Agent and Borrower shall negotiate in good faith within thirty (30) days to designate a successor benchmark. Until a successor is designated, GPU Collateral Value shall be determined by the Administrative Agent using the last published CRI 8-GPU Node Rate for the affected model, subject to a 0.25% per month reduction factor for each month of unavailability.

Section 8.09 — GPU Collateral Minimum Source Coverage

Borrower shall promptly notify the Administrative Agent if CCIR publishes any CRI 8-GPU Node Rate accompanied by a source_coverage flag of REDUCED or SUSPENDED. Such notification shall be delivered within one (1) Business Day of CCIR's publication of such flag.

PART II — Exhibit F: Borrowing Base Certificate

Borrower:	Hypothetical GPU Compute LLC ("Borrower")
Administrative Agent:	[Lender / Agent Bank]
Determination Date:	March 31, 2026
Certificate Date:	April 2, 2026
Certifying Officer:	[Name], Chief Financial Officer

Schedule 1 — CRI Reference Rate Verification

Parameter	H100 (SXM5)	B200 (SXM)	Source / Notes
Index Name	CRI-8G-H100	CRI-8G-B200	CRI-8G Benchmark Series
GPU Model	NVIDIA H100 SXM5 80GB	NVIDIA B200 SXM 192GB	8-GPU node, noninterruptible
Observation Window	7-day trailing (Mar 25–Mar 31)	7-day trailing (Mar 25–Mar 31)	Per §3.1, Methodology v1.0.0
CRI 8-GPU Node Rate	$3.50 / GPU / hr	$5.50 / GPU / hr	Published: computecreditindex.com
Contributing Sources	6 of 6 (Full)	5 of 5 (Full)	source_coverage: STANDARD
Methodology Version	v1.0.0	v1.0.0	No material revisions
Prior-Month Rate (Feb 28)	$3.62 / GPU / hr	$5.68 / GPU / hr	MoM: −3.3% / −3.2%

Schedule 2 — Eligible GPU Collateral Inventory

Facility	GPU Model	Units	Interconnect	Node Config	Status	Eligible?
Austin TX-1	H100 SXM5 80GB	480	NVLink / SXM5	8-GPU	Operational	**Yes**
Denver CO-1	H100 SXM5 80GB	320	NVLink / SXM5	8-GPU	Operational	**Yes**
Austin TX-2	B200 SXM 192GB	256	NVLink / SXM	8-GPU	Operational	**Yes**
Atlanta GA-1	B200 SXM 192GB	128	NVLink / SXM	8-GPU	Operational	**Yes**
Seattle WA-1	H100 SXM5 80GB	400	NVLink / SXM5	8-GPU	Maintenance	**No**[1]

Total Eligible H100:	**800 GPUs**	(100 nodes × 8 GPUs)
Total Eligible B200:	**384 GPUs**	(48 nodes × 8 GPUs)

[1] Seattle WA-1 units excluded from Eligible GPU Collateral pending completion of scheduled maintenance (expected April 8, 2026). Units will be added to the Eligible pool upon return to operational status per §5.01(c) of the Security Agreement.

Utilization Assumption: 72.0%, reflecting a Training Workload Percentage of 70%. The 72.0% training rate represents a conservative estimate of productive utilization in an on-demand redeployment scenario relevant to a lender's LTV calculation. Actual Borrower utilization is reported separately and does not affect this calculation.

Schedule 3 — Borrowing Base Calculation

Per-model calculation. Each Eligible GPU Model contributes independently to the aggregate GPU Collateral Value using its own CRI 8-GPU Node Rate. All other parameters are set at closing.

H100 SXM5 80GB

Line Item	Formula / Reference	Amount
(A) Eligible GPU Unit Count	Schedule 2	800
(B) CRI 8-GPU Node Rate	CRI-8G-H100, Mar 31, 2026	$3.50 / hr
(C) Utilization Assumption	Fixed per §7.02	72.0%
(D) Annual GPU Hours	365 × 24	8,760 hrs
(E) Gross Annual Revenue / GPU	B × C × D	$22,075
(F) Total Gross Annual NOI	A × E	$17,660,160
(G) GPU Capitalization Rate	§7.02(b)	28.0%
(H) H100 Collateral Value	**F ÷ G**	**$63,071,999**

B200 SXM 192GB

Line Item	Formula / Reference	Amount
(A) Eligible GPU Unit Count	Schedule 2	384
(B) CRI 8-GPU Node Rate	CRI-8G-B200, Mar 31, 2026	$5.50 / hr
(C) Utilization Assumption	Fixed per §7.02	72.0%
(D) Annual GPU Hours	365 × 24	8,760 hrs
(E) Gross Annual Revenue / GPU	B × C × D	$34,689
(F) Total Gross Annual NOI	A × E	$13,320,576
(G) GPU Capitalization Rate	§7.02(b)	28.0%
(H) B200 Collateral Value	**F ÷ G**	**$47,573,486**

Aggregate Borrowing Base

Line Item	Formula / Reference	Amount
(H-1) H100 Collateral Value	Above	$63,071,999
(H-2) B200 Collateral Value	Above	$47,573,486
(H) Total GPU Collateral Value	**H-1 + H-2**	**$110,645,485**
(I) Advance Rate	§7.02(b)	65.0%
(J) Gross Borrowing Base	H × I	$71,919,565
(K) Administrative Agent Reserves	§2.04(c)	($0)
(L) BORROWING BASE	**J + K**	**$71,919,565**

Schedule 4 — Compliance Test & LTV

Test	Result	Status
Outstanding Credit Exposure (M)	$45,000,000	—
Borrowing Base (L)	$71,919,565	—
Borrowing Base Deficiency (M – L, if positive)	$0 (No Deficiency)	✓ **COMPLIANT**
LTV Ratio (M ÷ H)	$45.0M ÷ $110.6M = 40.7%	✓ **COMPLIANT (max 80%)**
Available Capacity (L – M)	$26,919,565	—
§7.01 Revenue Coverage	See Compliance Certificate	✓ **COMPLIANT**
§7.03 Contract Renewal Risk	See Compliance Certificate	✓ **COMPLIANT**

Schedule 5 — Rate Cap Scenario Analysis (§7.02(d))

	Base Case	–25% Stress	–35% Stress	–50% Stress
CRI-8G-H100 ($/GPU/hr)	$3.50	$2.63	$2.28	$1.75
CRI-8G-B200 ($/GPU/hr)	$5.50	$4.13	$3.58	$2.75
H100 Collateral Value	$63.1M	$47.3M	$41.0M	$31.5M
B200 Collateral Value	$47.6M	$35.7M	$30.9M	$23.8M
Total GPU Collateral Value	$110.6M	$83.0M	$71.9M	$55.3M
Borrowing Base (65%)	$71.9M	$53.9M	$46.8M	$35.9M
Outstanding ($45.0M)	$45.0M	$45.0M	$45.0M	$45.0M
Cushion / (Deficiency)	**+$26.9M**	**+$8.9M**	**+$1.8M**	**($9.1M)**
LTV Ratio	**40.7%**	**54.2%**	**62.6%**	**81.4% ⚠**
Status	✓	✓	✓	**⚠ Breach**

Note: The –50% scenario generates a $9.1M Borrowing Base Deficiency at an 81.4% LTV, breaching the 80% LTV covenant. The –35% scenario remains narrowly compliant with a $1.8M cushion. Because both GPU models are stressed uniformly, the per-model composition of the collateral pool does not change the stress outcome — but in practice, next-generation GPUs may exhibit different rate trajectories than prior-generation hardware.

§7.02(d) Notification — Not Required

No Rate Cap Scenario produces a Borrowing Base Deficiency at the –35% stress level. No §7.02(d) notification is required with this Certificate.

Officer Certification

The undersigned, a duly authorized officer of Hypothetical GPU Compute LLC ("Borrower"), hereby certifies to the Administrative Agent and each Lender as of the Determination Date set forth above that:

(i) I have reviewed the terms of the Credit Agreement and the calculations set forth in this Borrowing Base Certificate;

(j) No Default or Event of Default exists as of the Determination Date, nor would result from the making of any Revolving Loan requested on the date hereof;

(k) The GPU Unit Count set forth in Schedule 2 is accurate and complete; all units listed as Eligible GPU Collateral satisfy the eligibility criteria set forth in the Security Agreement as of the Determination Date;

(l) The Training Workload Percentage is accurate as of the Determination Date and is based on Borrower's infrastructure monitoring systems and customer MSA records;

(m) The CRI 8-GPU Node Rates of $3.50/GPU/hr (H100) and $5.50/GPU/hr (B200) used in Schedule 3 were obtained directly from computecreditindex.com as published by CCIR for the Determination Date. The Utilization Assumption of 72.0% is the rate specified in the Credit Agreement for training workloads and is not derived from Borrower's actual operational efficiency data. Borrower acknowledges that CCIR is an independent benchmark administrator and that Borrower has no affiliation with, control over, or influence on CCIR or its published rates;

(n) The Rate Cap Scenario analysis in Schedule 5 was calculated in good faith in accordance with §7.02(d); no §7.02(d) notification is required;

(o) All representations and warranties of Borrower set forth in Article V of the Credit Agreement are true and correct in all material respects as of the date hereof.
